

Campion School Geography Learning Journey

INTENT – To help our students develop the character to become effective Global Citizens in today's World. We expect our students to achieve their full potential and acquire skills that will help them become equipped for adult life...as we achieve success through respect, skills, learning AND achievement."

Take a gap year,
travel and
experience the world

Geography related post 18 courses
include environmental science, geology,
hazard management, climate science and
international relations
